

your airbag cushion solution

## PERIBOND® DRIVER BAG

Static and dynamic tests (drop rig 6m/s, 35kg) were done on the design shown at each temperature -35°C, +85°C, +20°C with serial inflator and module. The integrity of our bag was demonstrated. The volume of the Peribond bag was adjusted to the volume of the serial reference bag.

- Easy to Fold
- Package reduction by 30%
- Weight reduction by 30%
- No leakage, Vent control
- Weight and package reduction of other module components

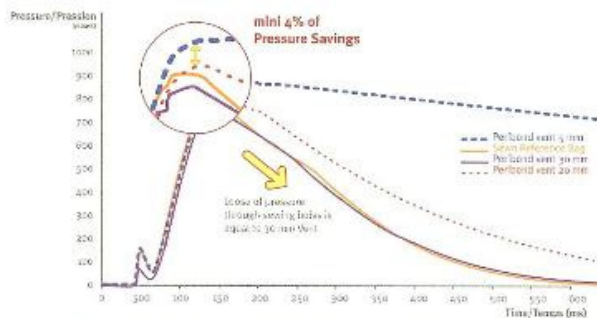

### WEIGHT

By conception, the Peribond® cushion is perfectly flat. In this case, the serial bag was a 16 x 16 700dtx 40g Si against our Peribond® bag's fabric a 13.5 x 13.5 470dtx 50g Si.

### BURST TEST COMPARISON

- The loss of gas through sewing is equivalent to a 30mm diameter vent hole in Peribond® bag. This is shown on the curve below:
