### PERIBOND® THORAX AND PELVIS THORAX

Tested Thorax Bag

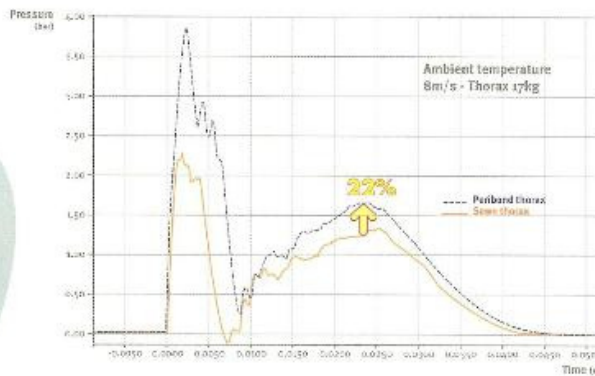

- Easy to Fold
- No leakage, Vent controlled
- High pressure resistance

Pelvis Thorax Bag (In development)

- Dynamic and static tests were performed on thorax bag at each temperature, as for all Peribond® bag the pressure is higher than with sewn bag, with equivalent venting.
- Increase of pressure in the Peribond® bag is +22%, down sizing of gas inflator can be done.

We have developed a new flexible bonded strip able to follow all kind of shapes. This way of assembly was tested on thorax bag and is going to be study on pelvis thorax, as this last requires high working pressure.
